New overarching professional standards for teachers, tutors and trainers in the lifelong learning sector

Ministerial Foreword

In 2004 the Government asked Lifelong Learning UK (LLUK) to develop new professional teaching standards for the whole FE system, as announced in *Equipping our Teachers for the Future*¹. These standards define what we expect of teachers, tutors and trainers in a variety of roles and responsibilities. I would like to thank LLUK for the work they have done. I believe these standards will contribute greatly to improving quality in teaching, training and learning across the further education system, and provide a key part of the infrastructure that will support the professionalisation of the workforce.

We all remember the teachers who inspired us and made sure we succeeded in our studies. They were responsible for sparking a lifelong interest or raising our sights and setting us on a particular road through life. Teachers, tutors and trainers in further education do this everyday. Six million learners a year are accessing further education learning and success rates have improved significantly – from 59 per cent in 2000/01 to 75 per cent in 2004/05.

There are already many excellent teachers, tutors and trainers working in further education. We want all to aspire to excellence – learners and employers deserve the best. That is why Government, LLUK and the further education system, with its diverse range of providers from colleges and work based learning to prisons and the voluntary and community sector, support the professionalisation of the workforce.

In the FE White Paper² and other recent announcements, Government pledged its continued commitment to introducing from September 2007 a new initial ‘preparing to teach’ award leading to Qualified Teacher, Learning and Skills (QTLS) status for all in the full teaching role.

These new professional standards have been developed specifically to respond to calls from Ofsted³ for clearer standards that new entrants to teaching in the sector should be expected to demonstrate that are relevant to teachers, tutors and trainers across the whole sector, and an emphasis on competence in teaching a particular area of specialism.

In developing the standards, LLUK has consulted extensively, holding consultation events, focus groups, web based questionnaires and meetings with individual stakeholders and the new standards command broad support from the system.

I am very pleased to recommend these new standards to you and I look to all of our partners to continue their excellent work together to make these reforms and full use of these standards a success.

Introduction

The professional standards for teachers, tutors and trainers in the lifelong learning sector describe, in generic terms, the skills, knowledge and attributes required of those who perform the wide variety of teaching and training roles undertaken within the sector with learners and employers. Not all standards will necessarily relate to all teaching roles. Rather they supply the basis for the development of contextualised role specifications and units of assessment, which provide benchmarks for performances in practice of the variety of roles performed by teachers, trainers, tutors and lecturers within the lifelong learning sector. Together, these will identify the components of: the initial teaching award (Passport); qualifications leading to Qualified Teacher, Learning and Skills (QTLS) status; and other intermediate and advanced teaching qualifications.

These developments will be complemented by a new Continuing Professional Development (CPD) expectation of teachers and trainers of, at the very least, 30 hours per year. Leadership training will be based on new revised standards for leadership and management within the sector and principals' qualifications will be introduced. These activities will be supported by new Centres for Excellence in Teacher Training (CETTS) from April 2007.

Development of the standards-based qualifications framework

Since April 2005, Lifelong Learning UK (LLUK) has conducted an extensive programme of consultation with the sector to develop, and ensure approval and ownership of, the standards. This has included detailed discussion with representatives of SSCs, regulatory authorities, unions, awarding institutions and individual provider organisations. Following this iterative consultation, draft standards were published in March 2006 and made available on the LLUK website. Feedback received, at events and from advisory and development groups, resulted in a reshaping of the presentation of the standards.

Development of the standards represents a vital first step in the construction of a new framework of qualifications for teachers in the further education system. Following the requirements set out within *Equipping Our Teachers for the Future*, LLUK identified specifications, drawn from the overarching standards, for the types of teaching role performed within the sector. These role specifications are expressed in terms of units of assessment, which clearly set out the learning outcomes and assessment criteria that teachers, tutors and trainers are expected to achieve. Units will be grouped together to make up the named qualifications for specific teacher roles, based on rules of combination determined by LLUK.

Some units within these qualifications will be mandatory and others optional, to allow for tailoring of qualifications to suit specific roles. It will be possible for mandatory units to be contextualised and for qualifications to contain specialist optional elements, so that the qualification will be generic to the sector, while maintaining relevance to a particular constituency or role. Units will be available as stand alone elements, elements within qualifications or, as required, for continuing professional development (CPD) purposes.

Introduction *continued*

Identifying roles in the further education system

The Learning and Skills sector is diverse, and encompasses both *teacher* roles and *teacher related* roles:

- *Teacher roles*: LLUK research has identified two distinct *teacher* roles in the sector beyond the 'Preparing to Teach' initial award: a role which contains limited teaching responsibilities and a role which represents the full range of responsibilities performed by those who are expected to attain the status of Qualified Teacher, Learning and Skills (QTLS). Qualifications for both distinct *teacher* roles will be in place from September 2007.
- *Teacher related roles*: examples of these include the role of professional assessor and a variety of teacher related roles, where elements of teaching are combined with elements of, for example, supporting other teachers and trainers through coaching, supporting learning, or management. In the future, as *teacher related roles* become more clearly defined, further qualifications appropriate to such roles will be introduced. 'Mini Awards' will also be developed as necessary, to recognise these kinds of specialist professional activity.

Working within the Qualifications and Credit Framework (QCF)

Equipping Our Teachers for the Future requires LLUK to work within the emergent Qualifications and Credit Framework (QCF):

Looking ahead, we will ask LLUK to work with QCA on the creation of a qualifications framework for the sector that is unit and credit based. We want the framework to build to qualifications for teachers, trainers, managers and support staff across the sector and to facilitate progression and development for staff at all levels.

LLUK will ensure that this development articulates across the sector, and facilitates progression within and across sector boundaries. The new Teacher Qualifications Framework will provide opportunities for credit accumulation and transfer (CAT), which will ensure that prior qualifications and credit are appropriately recognised by awarding institutions operating within the sector. This will enhance access to teaching and progression opportunities for those who need to take a staged approach to their career development.

Please note:

Teacher – The word teacher has been used as a generic term for teachers, tutors, trainers, lecturers and instructors in the Learning and Skills Sector.

Area of Specialism – This represents the professional, vocational or subject area in which the individual has been employed to teach.

New professional standards for teachers, tutors and trainers in the lifelong learning sector

Teachers in the lifelong learning sector value all learners individually and equally. They are committed to lifelong learning and professional development and strive for continuous improvement through reflective practice. The key purpose of the teacher is to create effective and stimulating opportunities for learning through high quality teaching that enables the development and progression of all learners.

These are the overarching professional standards for all those who teach in the lifelong learning sector.
